L=Likelihood S=Severity L*S= Risk 1=Low 5=High Risk is worked out using numbers 1 - 5.

The likelihood is given a number and this is multiplied by the number given to the severity of the risk.

The result = the risk factor. This generic risk assessment is brief and we have our own individual assessments for each individual risk, 25 being the worst possible outcome, any item reaching 25 would give serious cause for concern

& we would not be able to erect the unit. It is recommended that clients undertake their own risk assessment to suit their requirements.

This is a generic risk assessment that only applies in normal conditions.

Should there be any unexpected influencing factors, this risk assessment must be amended to suit.

The provision of this risk assessment is intended as a guide only and cannot be used as a substitute for your own risk assessments being carried out.

COMPILED & REVIEWED BY ANDY SWAYSLAND - SEPTEMBER 2019

The above is based on guidelines and advice from the manufacturer and Ultimate Rodeo Bulls Ent operating the equipment within current HSE requirements.

Any incidents must be reported to the Event Organiser in the first instance and Ultimate Rodeo Bull Ent.

The current Public Liability Insurance covers each item, for an amount of £5 million subject to our Terms and Conditions.

If there are any questions relating to the use of the equipment, please contact Ultimate Rodeo Bulls - 01832 731895

FURTHER ACTION TO TAKE

Extra strapping and weights if windy.

Check all Blower Pipes before the start of the event.

Players are advised that most games are a test of accuracy not strength.

None

None

Additional Safety Fencing will be erected at large events.

None
